THE SAFE CHECKER PLAYER

THE BLACK SIDE

[A companion volume examines the game from the point of view of the White side—seeking a complete draw against each of Black's seven possible first moves.]

PREFACE.

In social checkers the object of the player is to win—in scientific checkers the purpose is not to lose.

The design of this book is to show the player who starts the game with 9–14 that there is a safe reply to anything and everything his opponent may try against him.

The point of view in the selection of the lines here given is that of the experienced player.

An acute observer has remarked that "every book is full of chaff, especially a checker book." Those who have attempted to keep comprehensive records of the game understand the significance of that remark. The most successful players "cut out" the play they do not need, and the big book they are supposed to carry in their memories would probably seem to the inexperienced enthusiast a very small affair.

Theoretically the game of checkers is allied to the infinite, but in reality it is provokingly finite—to those who lose.

W. T. CALL.
